

Suggested Syllabus Statement for Digital Accessibility of Course Materials

Version 3/27/26

Digital Accessibility of Course Materials

I have made every effort to ensure that all digital content, documents, and multimedia in this course meet current ADA standards and accessibility guidelines. My goal is to ensure that all materials are usable by all students from day one. If you encounter any content that is not accessible, please contact me immediately. I will work with the school to resolve the issue or provide an equally effective alternative format as quickly as possible. If you require specific academic accommodations due to a documented disability, please contact the Office of Disability Resources.
